PUB TYPE	Statistical Data (110) -- Reports - Descriptive (141)
EDRS PRICE	MF01/PC15 Plus Postage.
DESCRIPTORS	*Achievement Tests; Elementary Secondary Education; Ethnic Groups; Grade 4; Grade 7; Grade 10; *Language Usage; *Mathematics Achievement; *Minority Groups; National Norms; *Reading Achievement; Scores; State Programs; Testing Programs; *Test Results; Test Use
IDENTIFIERS	*Arizona Pupil Achievement Testing; Iowa Tests of Basic Skills; Percentile Ranking; Tests of Achievement and Proficiency

ABSTRACT

In the 1995-96 school year, the 16th year of the Arizona Pupil Achievement Testing Program, the state Board of Education mandated testing for grades 4, 7, and 10. The Iowa Tests of Basic Skills (ITBS) were administered at grades 4 and 7, and the Tests of Achievement and Proficiency (TAP) at grade 10. Test scores are reported by subject, subtest, and skill at the student and classroom levels, and aggregated scores are provided for the school, district, county, and state levels. In fall 1995, 156,339 students were tested, with 6,236 students exempted because of limited English proficiency and 7,424 exempted for disabilities. Test results in this report are based on the tested students in 1,148 schools in 254 districts statewide. Average student performance in reading comprehension was slightly below the national average in grade 4, but well above the national averages in grades 7 and 10, even though these scores were slightly below those for Arizona students in the preceding school year. Scores for language usage and expression were below the national average for grade 4, and well above it in grade 7. No comparisons were possible in grade 10 since a statewide language test was not administered in that grade. Arizona averages for mathematics exceeded national averages for grades 4 and 7, but the grade 10 average fell below the national mark. White and Asian/Pacific Islanders scored above national averages on all tests at all three grade levels; other ethnic groups averaged below the national averages. Appendixes present reading, language, and mathematics individual percentile ranks for Arizona schools. (Contains 10 tables, 6 figures, and 3 lengthy tables in the appendixes.) (SLD)

Statewide Report

Arizona Pupil Achievement Testing
1995–96 School Year

Introduction

This is the sixteenth year of the Arizona Pupil Achievement Testing Program which is administered to fulfill the requirements of Arizona Revised Statutes Section 15-741 through Section 15-744. This legislation mandates that a nationally standardized norm-referenced achievement testing program in the subjects of reading, grammar, and mathematics be adopted and implemented for use in Arizona schools. The legislation exempts the testing of pupils with specified disabilities and allows the governing board of a school district to exempt pupils who are limited English proficient (LEP) for up to three consecutive school years.

For the 1995–96 school year, the Arizona State Board of Education mandated testing at grades 4, 7, and 10. Under contract with The Riverside Publishing Company, the *Iowa Tests of Basic Skills (ITBS)* were administered at grades 4 and 7 and the *Tests of Achievement and Proficiency (TAP)* at grade 10. Test scores are reported by subject, subtest, and skill at the pupil and classroom levels. Aggregated scores are provided for the school, district, county, and state levels.

A total of 156,339 Arizona pupils in grades 4, 7, and 10 were tested during the fall of 1995 under the mandated statewide achievement testing program. A total of 6,235 pupils who were LEP were exempted from testing as were 7,424 disabled pupils. The test results in this report are based on the performance of the tested pupils for grades 4, 7, and 10 who were enrolled in 1,148 schools in 254 districts statewide.

This report briefly describes the tests, subtests, test scores, and reports that fulfill the requirements of the legislation as implemented by the Arizona Department of Education. It summarizes the fall 1995 Arizona statewide results by grade and across grades. Discussions of pupil achievement strengths and weaknesses by grade level and demographic characteristics are included.

Description of Tests

The *ITBS* and *TAP* are nationally standardized achievement tests. A standardized test is one that has been administered using specific instructions under specific testing conditions to a representative sample of pupils from across the nation. The scores that result from this controlled test administration become the norms that may be used to compare the performance of an individual pupil or groups of pupils with that of pupils and groups of the same age and grade across the nation. The scores of Arizona pupils in 1995 are compared to the norms of the 1987–88 national standardization of the *ITBS* and *TAP*.

The 1995 testing program required the administration of selected subtests contained in the *ITBS* and *TAP* batteries. These subtests are indicated in Table 1. Tables 2 and 3 indicate the number of items for each subtest on the *ITBS* and *TAP*, respectively.

Table 1
Subtests Administered
ITBS* and *TAP
1995

ITBS **Grades 4 and 7**	Vocabulary (V) Reading Comprehension (R) Language Usage and Expression (L-4) Mathematics Problem Solving (M-2)
TAP **Grade 10**	Reading Comprehension Mathematics

Tests of Achievement and Proficiency
1995

Subtest	Grade 10
Reading Comprehension	58
Mathematics	48

Demographic Information

The following five variables were collected for each pupil during the test administration:

- **Sex**
- **Primary Language**
- **Limited English Proficient (LEP) in Programs by Model**
- **Racial/Ethnic Background**
- **Continuous Number of Years Enrolled in the District**

The collection of this information makes possible the analysis of test results for specified groups of pupils. Information on the variables of Sex, Primary Language, and Racial/Ethnic Background is reported in the following tables:

Grade 4: Table 6, Page 20

Grade 7: Table 8, Page 23

Grade 10: Table 10, Page 26

Description of Reports

The results of the Arizona Pupil Achievement Testing program are reported at six levels:

- **Pupil**
- **Classroom**
- **School**
- **District**
- **County**
- **State**

Pupil

Two sets of reports are produced for each pupil in grades 4 and 7: **Individual Performance Profile** and **Pupil Home Report**.

Individual Performance Profile. The report is designed for use by the classroom teacher and describes each pupil's performance by skill, subject, and subtest.

Pupil Home Report. This report presents test results to parents and guardians. The narrative portion explains the numeric scores to the parent. A graphic display identifies the pupil's strengths and weaknesses.

For the grade 10 pupils, the **Individual Performance Profile** is distributed to classroom teachers and to parents.

Classroom

Two reports are provided which list individual pupil scores in classroom groupings: **Classroom Report** and **Classroom Performance Profile**.

Classroom Report. This report lists each pupil's test scores. It can be used to compare pupil and total class performance with that of the norm group. Individual pupil and class strengths and weaknesses are identified.

Classroom Performance Profile. This report lists pupil performance by subtest and identifies pupil strengths and weaknesses.

School

Three reports are produced for each school: **School Report**, **Building Performance Profile**, and **Analysis of Variables Report**. The **School Report** and **Building Performance Profile** are similar to the classroom reports in concept, format, and function. These two reports list teachers within a school and the average scores earned by their classes.

The **Analysis of Variables Report** displays the subtest results schoolwide by grade for each of the five demographic variables:

- **Sex**
  - Male
  - Female

- **Primary Language**
  - English
  - Spanish
  - Spanish Exclusively
  - Navajo
  - Navajo Exclusively
  - Other
  - Other Exclusively

- **Limited English Proficient (LEP) in Programs by Model**
  - Transitional Bilingual K–6
  - Secondary Bilingual 7–12
  - Bilingual/Bicultural K–12
  - English as a Second Language (ESL)
  - Individual Education Program

- **Racial/Ethnic Background**
  - White (not of Hispanic origin)
  - Black (not of Hispanic origin)
  - Hispanic
  - American Indian or Alaskan Nə ə
  - Asian or Pacific Islander

- **Continuous Number of Years Enrolled in the District**
  - Less than 1
  - 1 but less than 2
  - 2 but less than 4
  - 4 but less than 6
  - 6 but less than 8
  - 8 but less than 10
  - 10 to 12
  - More than 12

District

Five reports are produced for each district:

- **District Report**
- **District Skills Report**
- **Analysis of Variables Report**
- **District Summary Report**
- **Frequency Distribution of Percentiles**

The **District Report** and **District Skills Report** parallel those described in the previous sections except that score averages are listed by school.

The **Analysis of Variables Report** provides a districtwide analysis of each variable by grade.

The **Frequency Distribution of Percentiles** displays the cumulative percentage of Arizona pupils achieving at each national percentile rank.

The **District Summary Report** displays the district's score averages by subtest and subject together with the county, state, and national averages.

County

Five reports are produced for each county. These are similar to those described in the district section above except that district data are aggregated to their respective county level.

State

Five reports are also produced for the state. Once again, these reports are similar to the district report descriptions given above but with district data aggregated to the state level.

Description of Reported Scores

Four types of scores are used to report the test results presented in the Statewide Report:

- **Scale Score**
- **Grade Equivalent**
- **Percentile Rank**
- **Stanine**

Scale Score and Grade Equivalent are examples of *developmental* scores. Developmental scores are used when comparisons of pupil performance within a reference group, such as groupings by grade or age, are required or desired.

Percentile Rank and Stanine are *status* scores. They allow us to compare the relative status or rank of a pupil's performance within a given group of pupils, such as a class, district, state, or nation.

Scale Scores (Developmental)

The Developmental Standard Scores (DSS) for *ITBS* and *TAP* generally range from approximately 1 to 300. They are continuous across all levels and forms of a specific test. Since they are built on equal-interval scales, the magnitude of a given difference between two scores represents the same amount of difference in performance wherever it occurs on the scale; i.e., the difference between DSS scores of 50 and 55 represents the same amount of difference as between DSS scores of 160 and 165.

When using scale scores one should expect higher scores as well as greater variability among scores from grade to grade. It is important to point out that while DSS scores are equivalent across forms and levels of the same test they are not equivalent from one subject to another. It is possible to meaningfully compare scale scores for Reading Comprehension from grade 7 to grade 10 but not to compare scale scores for Reading Comprehension to those for Written Expression. The major use of scale scores is to measure achievement growth from grade to grade or from year to year.

The DSS scores for *ITBS* and *TAP* are linked to form continuous scales for grades K–12 as follows. The *ITBS* and *TAP* scores for Mathematics are not comparable. The *ITBS* scores are for Mathematics Problem Solving; the *TAP* scores include Mathematics Problem Solving, Concepts, and Computation.

ITBS		*TAP*
Reading Comprehension (Levels 7–14)	–	Reading Comprehension (Levels 15–18)
Language Total (Levels 7–14)	–	Written Expression (Levels 15–18)
Mathematics Total (Levels 7–14)	–	Mathematics (Levels 15–18)
Work Study Total (Levels 7–14)	–	Using Sources of Information (Levels 15–18)
Complete Composite (Levels 7–14)	–	Basic Composite (Levels 15–18)

Grade Equivalents (Developmental)

A grade-equivalent score (GE) represents the typical performance of pupils tested in a given month of the school year. For example, a grade equivalent of 53 represents the score achieved by the median pupil in fifth grade after three months of instruction. On the *ITBS*, GEs range from P0 (prekindergarten) to 139. GEs on the *TAP* extend above 139. These extensions should be considered similar to a scale score, which permits growth comparisons to be made, rather than representing a median level of instruction.

The GE should be regarded as an estimate of where a pupil is along a developmental continuum but not where the pupil should be placed in the graded organization of the school. For example, a third grader taking a third grade mathematics subtest might earn a GE of 59. This means that this third grade pupil scored as well as an average pupil in the ninth month of the fifth grade would score on the third grade test. This score is above average for third grade but does not mean that the pupil is capable of doing fifth grade work successfully.

Percentile Ranks (Status)

A percentile rank (PR) indicates a pupil's status relative to other pupils in a defined norm group. They range from 1 to 99 and give the percentage of pupils in the norm group who achieve lower scores. Thus, if a pupil receives a PR of 63 it means that 63 percent of the pupils in the norm group scored lower than this particular pupil. PRs have no interpretive meaning in themselves. They must always be used in conjunction with the norm group. Most often the norm group is the group of pupils in a given grade that were part of the national standardization group.

PRs are not built on equal interval scales and so the difference between a PR of 10 and a PR of 15 is not the same as the difference between PRs of 50 and 55 in terms of pupil ability. Another way of saying this is that the PR scale is nonlinear. For example, a DSS of 130 may be associated with a PR of 17 while a DSS of 140 on the same test may be associated with a PR of 20 (10 points difference on DSS = 3 points difference on PR). However, a DSS of 120 may be associated with a PR of 63 while a DSS of 130 on the same test may be associated with a PR of 80 (10 points difference on DSS = 17 points difference of PR).

Two types of percentile ranks are reported for the 1995 Arizona Pupil Achievement Testing program: *individual* PRs and *group* PRs. *Individual* percentile ranks were reported for individual pupils on class lists returned to the schools. They are also used for the group data (sex, primary language, racial/ethnic, etc.) reported for analyses of variables. Both *individual* and *group* percentile ranks are reported for class, building, and district summaries returned to school districts. *Group* percentile ranks may be used to report total state achievement summaries and comparisons with national averages.

When interpreting percentile rank data, it is important to keep in mind the characteristic differences of the individual PRs and the group PRs. First, individual PRs are developed from the distribution of individual pupil scores in the standardization sample. Group PRs, as the name implies, are derived from the distributions of *averages* of schools in the standardization sample. Remember that group distributions will tend to have a narrower range than individual distributions because each school *average* score is always higher than the lowest pupil score and lower than the highest pupil score.

Second, the distribution of individual percentile ranks is much larger than the distribution of group percentile ranks because each group contains many individuals. For these reasons, the distributions of group PRs are much less variable than the distributions of individual PRs. The relationship between pupil and group percentile ranks is shown in the table that follows. The data in this table are based on Reading Comprehension, Grade 7, 1988 *ITBS* fall norms.

Percentile Rank (Status) cont.

Pupil or Average GE Score	Pupil PR	Group PR
103	95	99
83	71	86
77	60	66
72	50	44
66	39	22
56	21	3
48	10	1

Stanines (Status)

Stanines are normalized standard scores with a mean of 5, a standard deviation of 2, and range from 1 to 9. Stanines may be regarded as rather broad groupings of percentile ranks as shown in the table that follows:

PRs	Stanine
96 and up	9
89 - 95	8
77 - 88	7
60 - 76	6
40 - 59	5
23 - 39	4
11 - 22	3
4 - 10	2
less than 4	1

Unlike PRs, stanines are approximately equal-interval scores. This means that the difference between stanines 2 and 4 represents about the same difference in ability as the difference between stanines 5 and 7. This property allows stanines to identify broad performance categories as follows: stanines 1, 2, and 3 indicate below average performance; stanines 4, 5, and 6 indicate average performance; and stanines 7, 8, and 9 represent above average performance.

Exemptions from Statewide Testing

Conditions under which pupils may be exempted from the statewide testing program are specified in Arizona Revised Statutes Section 15-744 as listed below:

1. Pupils who are limited English proficient (LEP) may be exempted for up to three years.

2. Pupils who are disabled as defined in the categories below and whose individual educational plans state that parts or all of the testing requirement would be detrimental to the pupil may be exempted from the testing requirement:

    - Mild Mental Retardation
    - Moderate Mental Retardation
    - Severe Mental Retardation
    - Emotional Disability
    - Specific Learning Disability
    - Multiple Disabilities
    - Autism
    - Visually Impaired
    - Hearing Impaired
    - Orthopedically Impaired
    - Speech/Language Impaired
    - Traumatic Brain Injury
    - Other Health Impaired

The governing board of a school district may exempt pupils from testing if they are LEP and are enrolled in an instructional program as prescribed by A.R.S. Section 15-754 from the nationally standardized norm-referenced achievement testing requirement not to exceed three consecutive years. The first year of the exemption is the first academic year in which the pupil is enrolled in a school district in this state in grade two or above. The instructional program for limited English proficient pupils who are exempt from the nationally standardized norm-referenced achievement testing requirement as provided in this subsection shall include an alternative assessment of achievement to be administered annually pursuant to standards prescribed by the state board.

School districts shall annually report the number of pupils, by category and by grade level, which were exempted as provided in this section to the Department of Education. The Department shall include this information in their annual report to the Legislature pursuant to Section 15-743.

At the request of a pupil's parent or guardian, the governing board of a school district shall administer any test required by this Article to pupils exempted from the testing requirement pursuant to this Section. Test results for these pupils shall not be included in the summary results of tests prescribed in Section 15-743, but individual results shall be sent to the school and to the parent or guardian.

In fall 1995, a total of 6,235 pupils who were classified LEP were exempted from the statewide testing program. The primary language of 94.9 percent of these pupils is Spanish.

The numbers of first-, second-, and third-year LEP exempted pupils are provided in the following table. This table also lists the number of pupils in disabled categories, by grade level, who were exempted from the testing requirement.

Table 4
Number of Exempted Pupils
1995

Category	Grade 4	Grade 7	Grade 10	Total
Language	**3,786**	**1,432**	**1,017**	**6,235**
1st Year-Spanish	1,073	698	647	**2,418**
1st Year-Other	56	38	61	**155**
2nd Year-Spanish	1,058	417	189	**1,664**
2nd Year-Other	35	20	32	**87**
3rd Year-Spanish	1,511	246	81	**1,838**
3rd Year-Other	53	13	7	**73**
Disabled	**3,163**	**2,529**	**1,732**	**7,424**
Mild Mental Retardation	284	268	260	**812**
Moderate Mental Retardation	92	94	129	**315**
Severe Mental Retardation	10	14	5	**29**

Autism	17	9	8	**34**
Visually Impaired	9	14	3	**26**
Hearing Impaired	28	24	21	**73**
Orthopedically Impaired	15	19	11	**45**
Speech/Language Impaired	263	78	45	**386**
Traumatic Brain Injury	7	3	9	**19**
Other Health Impaired	17	18	12	**47**

Summary of Statewide Performance Across Grades

The *ITBS* and *TAP* were used in the 1995 Arizona Pupil Achievement Testing program. The *ITBS* was administered in grades 4 and 7, and *TAP* in grade 10.

The norms used in fall 1995 were based on national pupil performance in the 1987-88 school year.

When comparing Arizona average scores across years or with national norms, it is important to remember that small score differences may not always indicate meaningful differences in achievement. For example, the degree of variability in the scores at any grade level or location in the distribution may have a large impact on the interpretation to be placed on observed score differences.

Figures 1, 2, and 3 graphically compare Arizona statewide grade-equivalent averages in Reading, Language, and Mathematics with national averages. Comparisons are also made with Arizona averages obtained in 1992, 1993, and 1994.

Figure 1 shows that Arizona average pupil performance in Reading Comprehension is slightly below the national average in grade 4, but well above the national averages for grades 7 and 10. The 1995 average Reading Comprehension scores for grades 4, 7, and 10 are slightly lower than the 1994 scores.

Figure 2 shows that the 1995 average scores in Language Usage and Expression are below the national average in grade 4, but well above the national average in grade 7. The 1995 Arizona grade 4 average score in Language is well above that reported for 1992 and 1993 and about the same as 1994. The 1995 Arizona average for grade 7 is about the same as averages for the previous two years. No comparisons are available for grade 10 because a statewide language test was not administered in that grade.

As shown in Figure 3, Arizona averages for mathematics exceed national averages for grades 4 and 7, but the grade 10 average falls shy of the national mark. The 1994 and 1995 grade 4 Mathematics averages are the same, which is the highest score reported for this comparison period. The averages for grades 7 and 10 fall slightly below those reported for 1994.

Summary of Statewide Achievement by Grade

The pages that follow present discussions of pupil performance by grade for grades 4, 7, and 10. For each grade, strengths and weaknesses based on average percentile-rank scores are discussed. For grades 4, 7, and 10, achievement gains are reviewed based on scores obtained on the same subtests in the 1992–95 test administrations.

Each discussion is augmented by a graph and two tables. The first table reports:

- Average scores for the 1995 grade groups and the national norms groups using national percentile ranks for individual pupils.
- Average scores for the 1995 grade groups and the national norms groups using national percentile ranks for groups (schools).

These tables can be found on the following pages:

Grade 4: Table 5, Page 19

Grade 7: Table 7, Page 22

Grade 10: Table 9, Page 25

The second table provides analyses of scores by the following group variables:

- Sex
- Primary Language
- Race/Ethnicity

These tables can be found on the following pages:

Grade 4: Table 6, Page 20

Grade 7: Table 8, Page 23

Grade 10: Table 10, Page 26

Grade 4

Strengths and Weaknesses. The 1995 average grade-equivalent score in Mathematics Problem Solving is above the national average. The grade-equivalent scores in Vocabulary, Reading Comprehension and Language Usage and Expression are below national averages. Average grade-equivalent scores range from 39.5 in Vocabulary to 41.6 in Mathematics. The national percentile ranks for these scores are 43 and 49, respectively.

Achievement Gain. The 1995 average percentile rank scores in Language and Mathematics are the same as those reported for the previous year, while those reported for Vocabulary and Reading Comprehension are one point lower. The Mathematics score for both 1994 and 1995 is the highest reported for the comparison period.

Figure 4

Comparative Performance for Grade 4

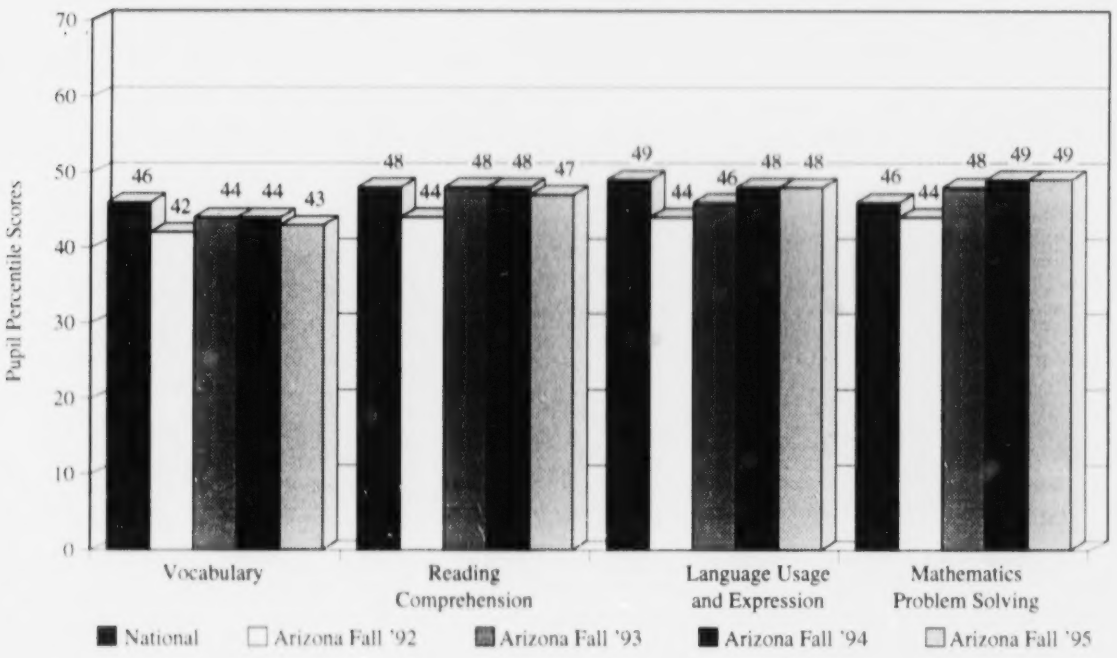

Table 5
Comparisons of Arizona Averages and *ITBS* 1988 National Norms
Grade 4
1995

Individual Norms

	National Norms			Arizona Averages		
	Grade Equivalent	Percentile Rank[a]	Stanine	Grade Equivalent	Percentile Rank[b]	Stanine
Vocabulary	40.8	46	5	39.5	43	5
Reading Comprehension	41.5	48	5	41.0	47	5
Language Usage and Expression	41.5	49	5	40.6	48	5
Mathematics Problem Solving	40.7	46	5	41.6	49	5

[a]Percentile ranks are for individuals. Percentile ranks for national values have been interpolated.
[b]Percentile ranks for state averages have been obtained by rounding average grade equivalents to the nearest whole number and converting them to percentile ranks from a conversion table.

Group Norms

	National Norms			Arizona Averages		
	Grade Equivalent	Percentile Rank[a]	Stanine	Grade Equivalent	Percentile Rank[b]	Stanine
Vocabulary	40.8	37	4	39.5	31	4
Reading Comprehension	41.5	40	5	41.0	37	4
Language Usage and Expression	41.5	43	5	40.6	38	4
Mathematics Problem Solving	40.7	41	5	41.6	47	5

[a]Percentile ranks are for group averages. Percentile ranks for national values have been interpolated.
[b]Percentile ranks for state averages have been obtained by rounding average grade equivalents to the nearest whole number and converting them to percentile ranks from a conversion table.

Grade 7

Strengths and Weaknesses. The 1995 grade 7 group scored well above the national averages for Reading Comprehension, Language Usage and Expression, and Mathematics Problem Solving, and below the national average in Vocabulary. The percentile-rank score for Vocabulary is two units below the national average, while percentile-rank scores exceed the national average for the other three tests by three to five units. State average grade-equivalent scores range from 69.3 in Vocabulary to 73.2 in Language.

Achievement Gain. The 1995 grade 7 group scored at the same average level in Mathematics Problem Solving as did the 1994 group. They scored averages on the Vocabulary and Language Usage and Expression that are one percentile rank below the marks for the previous year's group. The Reading average score is two percentile ranks lower than the 1994 group's score.

Grade 10

Strengths and Weaknesses. Arizona state averages in tenth grade are above the national average in Reading Comprehension and below the national average in Mathematics. The average national percentile ranks are 51 and 45, respectively.

Achievement Gain. The 1995 Arizona tenth-grade group scored the same in Reading Comprehension as the 1993 and 1994 tenth-grade groups. They scored two percentile rank units lower in Mathematics than the 1994 tenth-grade group.

General Summary of Findings

Arizona pupils tested in the fall 1995 Arizona Pupil Achievement Testing program collectively scored in the average ranges in reading, language, and mathematics. In general, they performed at about the same level of achievement as average pupils in the same grades across the nation during the 1987-88 school year.

Gender

- Average reading scores for females were higher than those for males at all three grade levels. The differences were one month higher at grade 4, two months at grade 7, and six months at grade 10.
- A similar pattern was found for the language tests at grades 4 and 7, where females scored three months and five months higher respectively.
- However, in mathematics, boys outscored girls by one month at grade 4, two months at grade 7, and five months at grade 10.

Racial/Ethnic

Scores were disaggregated according to racial/ethnic classifications designated on the answer sheets. These classifications, along with the percentages of tested students belonging to each group, are reported below:

White	52%
Black	4%
Hispanic	23%
American Indian or Alaskan	6%
Asian or Pacific Islander	2%
No Response	14%

The White and Asian/Pacific Islander groups scored above national averages on all tests at all three grade levels. Averages for the other groups were below national averages.

Statewide Achievement

- Arizona pupils scored in the average stanine range in all subject areas at all three grade levels.
- Reading Comprehension performance was slightly below the national average in grade 4, and well above the national averages in grades 7 and 10.
- Average performance on Language Usage and Expression was below the national average in grade 4, but above the national average in grade 7.
- Average performance on the mathematics subtests was above the national averages in grades 4 and 7, but below the national average in grade 10.
- Females tended to outscore males at all grade levels in Reading Comprehension and Language Usage and Expression. Males tended to outscore females in mathematics at all grade levels.
- The White and Asian/Pacific Islander groups scored above the national averages on all tests at all grade levels.

Appendices

Arizona Pupil Achievement Testing
1995–96 School Year

Contents

This is the sixteenth year of the Arizona Pupil Achievement Testing program which is administered to fulfill the requirements of Arizona Revised Statutes Section 15–741 through Section 15–744. This legislation mandates that a nationally standardized norm-referenced achievement testing program in the subjects of reading, grammar, and mathematics be adopted and implemented for use in Arizona schools.

To fulfill these legislative requirements for the 1995-96 school year, the Arizona State Board of Education mandated testing at grades 4, 7, and 10. Under contract with The Riverside Publishing Company, the *Iowa Tests of Basic Skills (ITBS)* were administered at grades 4 and 7 and the *Tests of Achievement and Proficiency (TAP)* at grade 10.

The following table indicates the subtests of the *ITBS* and the *TAP* which were administered to fulfill the requirements of the Arizona Pupil Achievement Testing program.

Mandated Subject	Grade	Test/Subtest
Reading	4,7	*ITBS*/Reading Comprehension
	10	*TAP*/Reading Comprehension
Language	4,7	*ITBS*/Language Usage and Expression
	10	No language subtest was administered at grade 10
Mathematics	4,7	*ITBS*/Mathematics Problem Solving
	10	*TAP*/ Mathematics

The fall 1995 Percentile Ranks (PR) for each of the required subtests in the testing program are developed from the distribution of individual pupil scores. On the *ITBS*, PRs for individuals are derived from the mean Grade Equivalent (GE). On the *TAP*, the PRs for individuals are derived from the mean Developmental Standard Score (DSS).
